

Diagnostic Criteria for the Most Common Temporomandibular Disorders: Symptom Questionnaire and Clinical Examination Items

All listed criteria in History (DC/TMD Symptom Questionnaire) and Examination (DC/TMD Examination Form) are required for the specific Diagnosis unless otherwise stated; each criterion is positive unless otherwise specified. Exact time period for time-relevant History or Examination items is not specified below since that is a function of how the items are constructed to suit a given purpose; the logic does not change according to time period. The time period as assessed by history items for disc displacement without reduction vs with reduction is relative.

Changes to this document

May 25, 2014

- Added “**OR**” to “Current TMJ noises by history” for each of Disc Displacement with Reduction and Degenerative Joint Disease, as per published DC/TMD.
- Added diagnostic criterion note to Headache Secondary to TMD, with regard to necessity of either a myalgia or arthralgia diagnosis in order to have a secondary headache.
- Corrected minor punctuation discrepancies.

April 29, 2014

- Corrected name of disorder “myofascial pain”; was incorrectly stated as “myofascial pain withspreading”.
